

Additional comments:

Thank you for the BSL translation video of Ofcom's proposals.

Question 1: Do you agree with Ofcom's proposed changes to the way we collect data, and do you have further comments?:

Yes, I agree that this is a good way of sending feedback to broadcasters if there are gaps in their access services.

Question 2: Do you agree with Ofcom's proposed changes to the type of data we collect, and do you have further comments?:

I agree. I am not sure if you are already collecting this information but it would be helpful to get clear data for how much of the broadcasters' content is sign-presented and how much is sign-interpreted.

BSL users understand TV content better if it's sign-presented, so it is important to have a clear distinction between these two types of signed services.

Question 3: Do you agree with Ofcom's proposed changes to the way we publish data, and do you have further comments?:

I agree.
