

IUR-fm supports Blast106's application to change its key commitments.

Community radio stations themselves are best placed to know the needs and wants of their own communities as they work with the communities at grass roots level.

We are fully aware of the great work done by Blast106 on a voluntary basis and in reading the proposals we feel that they will greatly enhance the service provided to the student community, many of whom come from Newry to study at Queens & Ulster, and the young people of Belfast.
