

Yes! Blast 106 is truly a great platform for the local and national community to engage and make a difference in this world. The shows are inventive, informative and entertaining and the station is a prime example of corporate social responsibility. Blast 106 has become increasingly popular among many of my friends and family with all of them being very complimentary. I believe this station has a lot more to give if only the remit was increased. I recommend that this application should be granted on the basis of their great work and good intentions.
