**Ofcom may publish a response summary:**

Yes

**I confirm that I have read the declaration:**

Yes

**Additional comments:**

**Question 1: Do you agree that we have identified the objectives which the small scale DAB multiplex trial should seek to achieve?:**

yes you have

**Question 2: Are there any other questions or issues which the small scale DAB multiplex trial should seek to address?:**

It might be worth assessing the impact of interference at the edge of coverage areas between different multiplexes on the same frequency in neighbouring areas to see how closely operators can be sited.

**Question 3: Do you agree with our proposed technical licence conditions?:**

Yes I do

**Question 4: Do you agree with our approach to non-technical licence conditions and requirements?:**

Yes I do

**Question 5: Do you agree with our proposed approach to awarding trial licences?:**

Yes I do although if money and time allowed and there was sufficient interest, much better data would be achieved by offering more than just the three trial licences, That way results could be compared between urban and rural areas, where the impact of geographical and non-geographical obstacles can be assessed on home and car based receivers. It would also give a better idea of studio to transmitter connectivity options.

**Question 6: Do you agree with our proposals set out in this section in relation to final reporting obligations, the recovery of the equipment and the extension of trial licence duration?:**

Yes I do
