Questions

Question 3.1: Do you agree that the modification to the Numbering Plan that we propose – which would prohibit direct or indirect revenue-sharing with callers and/or end-users by those who use 03 numbers – is appropriate and proportionate to address the conduct of concern that we have described in this document? If not, please explain why.

I do NOT agree because it is very expensive to call home and i got a contract to do so. I dont understand why i should not be able to call any particular number. I am already paying £50 a month for my contract and cant use it properly. So this means that the mobile network wins cos I am lots of free minutes spare each month

Question 4.1: Do you have any comments on the draft modifications to the Numbering Plan that we are proposing, as set out in Annex 7? Where you disagree with any of the proposed modifications, please explain why.

I do NOT agree because the companies online that provide this service is helping me. It is very expensive to call abroad, yes i use skype but for some people i need to use the mobile so i want to use this cheap service. Please help me.
