Questions

**Question 3.1:** Do you agree that the modification to the Numbering Plan that we propose – which would prohibit direct or indirect revenue-sharing with callers and/or end-users by those who use 03 numbers – is appropriate and proportionate to address the conduct of concern that we have described in this document? If not, please explain why.

I do not agree, My mobile network charges around 80pence per minute for me to call the Netherlands when I am already paying for my monthly contract I think this is extortionate.

The 03 numbers give me the option to use my already paid for minutes to call home, the mobile network are still getting my money from my contract and I get to call home.

If this were to go through you will be causing me to lose contact with family members who are not technical enough to use the internet all because I cannot afford to pay the high prices the mobile networks charge.

I can't afford to run a landline along side my mobile and I can't change my contract as I am locked in for another year and they will not allow me to downsize my inclusive minutes to make it cheaper.

Ofcom are supposed to help the consumer but this is doing the opposite and giving the greedy mobile networks more money.

**Question 4.1:** Do you have any comments on the draft modifications to the Numbering Plan that we are proposing, as set out in Annex 7? Where you disagree with any of the proposed modifications, please explain why.

I disagree because it will not permit me to use the current services.
