<p>Question 14: (Section 5) What is your view on the potential use of equipment with adaptive antenna technology (AAS) in the 3.8-4.2 GHz band? <p>Question 18: (Section 8) Do you agree with our proposal for the Local Access licence? Please give reasons supported by evidence for your views.</p>	<p>Confidential? – Y / N</p> <p>Yes. CBNL view this as a pragmatic way to promote the efficient use of spectrum. However, we would like to see the proposal extended additionally to cover the Broadband Fixed Wireless Access bands at 10GHz, 28GHz, 32GHz and 40GHz.</p> <p>Our reasoning is that similar conditions apply in these bands as in the mobile bands, namely:</p> <ol style="list-style-type: none"> 1. Licensees have exclusive access to the spectrum throughout the area licensed (either national or regional), but may not wish to use the spectrum throughout this area. 2. New users may be able to make use of the awarded spectrum in certain locations without impacting the incumbent licensee's use. 3. The comments at ¶8.5 about the complexity of "carving out" or sharing

	<p>access for a specific area are similarly applicable.</p> <p>As per ¶1.3, fixed wireless access (FWA) is likely to be a significant application that new users would wish to deploy, and the BFWA bands may be more appropriate for some deployments than mobile bands.</p>

<p>Question 20: (Section 8) What information should Ofcom consider providing for potential applicants in the future and why would this be of use?</p>	<p>Confidential? – Y / N</p>
<p>Question 21: (Section 8) Do you agree with our proposal to have a defined licence period and do you have any comments on the proposed licence term of three years?</p>	<p>Confidential? – Y / N</p> <p>A defined period seems necessary in order to allow for business planning. 5 years would be a more appropriate term, being better aligned with typical useful lifetime of network infrastructure.</p>
