Question	Your response
<p>Question 2.1: Do you agree with our overall approach to regulation in potentially competitive areas?</p>	<p>We do not agree with the overall approach to access to Dark Fibre, as we do not agree with the term 'potentially competitive'. How is this governed – IF a CP announces plans to build in a certain area the build time could be 2 years – so we feel that a 'potentially competitive' area should only be competitive as there is BT + 2 in that area. If you have BT +1 – then BT don't have to sell it gives the +1 a monopoly.</p>
<p>Question 2.2: What is your view of our access and charge control proposals for wholesale local access services in potentially competitive areas?</p>	<p>No Comment</p>
<p>Question 2.3: What is your view of our access and charge control proposals for leased line services in potentially competitive areas?</p>	<p>We agree with DF as the remedy and would strongly promote DFA in all Areas of non-competitive (2.26). We do not agree with removing leased lines as DPA is not an equivalent replacement (2.24). Agree with 2.25</p>
<p>Question 3.1: Do you agree with our overall proposed approach to regulation in non-competitive areas?</p>	<p>No we don't agree with the overall proposed approach as per q 2.1.</p>
<p>Question 3.2: Do you agree that a RAB charge control framework is appropriate for non-competitive areas? If not, please explain why you think an alternative is more appropriate.</p>	<p>No Comment</p>
<p>Question 3.3: Do you have any comments on the design of a RAB charge control for non-competitive areas?</p>	<p>No Comment</p>
<p>Question 3.4: Do you agree with our proposal to introduce dark fibre in non-competitive areas?</p>	<p>Yes we agree on the proposal to introduce dark fibre in non-competitive areas, but this does instigate an operational issue with CP's customers who may want a solution that covers a regulated and non regulated area – how do we manage a standard operational approach to this?</p>

Question 4.1: Do you agree with our proposed overall approach to QoS?	Yes we agree with the proposal on the overall approach to QoS.
Question 5.1: Do you agree with our overall approach to transitioning regulation as BT deploys its new fibre network?	No Comment
Question 5.2: Do you agree with our proposal not to require BT to offer new forms of wholesale access to its copper network?	No Comment
