

Your response

Question	Your response
<p>Question 1: Please provide feedback on the additions, amendments and clarifications we have made to the wording of the licence condition to implement our decisions on the scope of the licence condition in our October 2020 Statement, giving reasons for your response.</p>	<p>Confidential? – N It is totally unclear what you intend radio amateurs to do once this is part of the licence conditions. My antenna and equipment are within the boundaries of my property and therefore not legally accessible to the general public-what does this mean for me?</p>
<p>Question 2: Please provide feedback on the additions and clarifications to our 'Guidance on EMF Compliance and Enforcement', giving reasons for your response.</p>	<p>Confidential? – N The limits are not stated at any point that I can see. How am I supposed to assess the potential impact of this? What is Ofcom's response to criticism from BAe Systems and Sky Broadcasting? How are tests to be conducted and recorded? Who will be authorised to inspect?</p>
<p>Question 3: Please provide feedback on the trial version of our EMF calculator, giving reasons for your response.</p>	<p>Confidential? –N The most promising part of what appears to be a really silly exercise-but how can it be used if we don't know the limits? How can we evaluate this?</p>
