

Your response

Question	Your response
<p>Question 1: Please provide feedback on the additions, amendments and clarifications we have made to the wording of the licence condition to implement our decisions on the scope of the licence condition in our October 2020 Statement, giving reasons for your response.</p>	<p>Confidential? – N</p> <p>I am extremely concerned by the proposal to add the following provisions:</p> <p><u>4.147</u> - that the licence condition only requires licensees to comply with the ICNIRP general public limits in areas that are accessible to the general public</p> <p><u>4.148 and 4.149</u>- that licensees will not need to comply with the relevant levels in the ICNIRP general public limits if (i) radio equipment is being used for the purpose of seeking emergency assistance or reporting or responding to an emergency situation including for search and rescue activities and maritime emergency communications; and (ii) compliance with the relevant levels in the ICNIRP Guidelines for the protection of the general public is likely to result in or create an immediate and serious threat to the safety of the public or public health</p> <p>You are proposing permitting exposure levels above ICNIRP safety guidelines in order to avoid a threat to public health. This is a completely absurd contradiction.</p> <p>I strongly object to these aspects of the consultation and to Ofcom’s failure to separately ascertain the health impacts for itself without relying on Public Health England.</p>
<p>Question 2: Please provide feedback on the additions and clarifications to our ‘Guidance on EMF Compliance and Enforcement’, giving reasons for your response.</p>	<p>Confidential? – N</p> <p>At paragraph 1.5 of the document it is stated that not all mobile operators follow ICNIRP guidance and if they break the law, there is no one who can enforce action against them – not even Ofcom. There needs to be rigorous standards implemented by a government body</p>

	with genuine powers of enforcement.
Question 3: Please provide feedback on the trial version of our EMF calculator, giving reasons for your response.	N/A
