

## Your response

Question	Your response
<p><b>Question 1: Please provide feedback on the additions, amendments and clarifications we have made to the wording of the licence condition to implement our decisions on the scope of the licence condition in our October 2020 Statement, giving reasons for your response.</b></p>	<p>Confidential? –N</p> <p>I feel that when I worked dealing with RF levels with Vodafone, having to work with OFCOM regularly, we only allowed the very senior engineers to do RF calculations. So I feel it is wrong for radio amateurs to be requested to do what I regard as a complex issue. Any methods need to be approved by the RSGB who must supply amateurs with detailed help.</p>
<p><b>Question 2: Please provide feedback on the additions and clarifications to our 'Guidance on EMF Compliance and Enforcement', giving reasons for your response.</b></p>	<p>Confidential? –N</p> <p>Again I feel that the experts amateurs have for this are the RSGB who should work with OFCOM to complete simple procedures suitable for amateurs to use and understand.</p>
<p><b>Question 3: Please provide feedback on the trial version of our EMF calculator, giving reasons for your response.</b></p>	<p>Confidential? –N</p> <p>The form looked simple. But I felt it was too generic and even I found it difficult to work with and understand after 24 years working with RF aerials calculations.</p>
