

Your response

Question	Your response
<p>Question 1: Do you agree that Ofcom should consider working with relevant industry partners to develop a voluntary testing standard, and publishing a list on our website of static indoor mobile phone repeaters that comply with our licence exemption requirements?</p>	<p>Confidential? – n Yes</p>
<p>Question 2: Do you agree that we should modify IR 2102.1 to allow for ‘provider specific’ mobile phone repeaters? If you do not agree, please explain your reasons.</p>	<p>Confidential? – N The repeaters you have suggested before are only to serve the wealthy and do not comply with the equality act 2010 for communication s needy groups like people with disabilities and the poor and destitute.</p>
<p>Question 3: Do you agree that we should make ‘multi-operator’ mobile phone repeaters complying with the technical requirements outlined above (and set out in the draft UK Radio Interface Requirement IR 2102.3 at Annex A3) licence exempt? If you do not agree, please explain your reasons.</p>	<p>Confidential? – N Yes, poor families in remote locations are often on multiple networks, to ask them pay for 5 repeaters is inappropriate. Multi network repeaters will also assist with disaster relief efforts and can be run with a small cheap solar panel and an old car battery. I will be testing a 900mhz low power single band cheap £30 repeater from China for these purposes as a category 2 responder under the civil contingencies act. Ofcom is welcome to contact me for the results in a few months.</p>
<p>Question 4: Do you agree with our provisional view as set out in paragraph 3.48 above? If you do not agree, please explain why you think the requirement is not necessary.</p>	<p>Confidential? – N 3.48 above?</p>
<p>Question 5: Do you agree that it would not be appropriate to allow the use of licence-exempt repeaters in the 2.6 GHz band? If you do not agree, please explain your reasons.</p>	<p>Confidential? – N There would be special emergency situations where this could be necessary. There should be a circumstance where this is allowed.</p>
<p>Question 6: Do you agree that we should allow the use of static indoor mobile phone repeaters (on a licence-exempt basis) in the paired 700 MHz mobile band?</p>	<p>Confidential? – N As q 5.</p>
