Question	Your response
<p>Question 1: Do you agree that Ofcom should consider working with relevant industry partners to develop a voluntary testing standard, and publishing a list on our website of static indoor mobile phone repeaters that comply with our licence exemption requirements?</p>	<p>Confidential? – NO Yes I agree.</p>
<p>Question 2: Do you agree that we should modify IR 2102.1 to allow for ‘provider specific’ mobile phone repeaters? If you do not agree, please explain your reasons.</p>	<p>Confidential? – NO I do not agree as the mobile network operators should be jointly developing a mobile repeater that would work across all network providers so a customer can buy 1 repeater which would be compatible on any UK mobile network.</p>
<p>Question 3: Do you agree that we should make ‘multi-operator’ mobile phone repeaters complying with the technical requirements outlined above (and set out in the draft UK Radio Interface Requirement IR 2102.3 at Annex A3) licence exempt? If you do not agree, please explain your reasons.</p>	<p>Confidential? – NO Yes I agree</p>
<p>Question 4: Do you agree with our provisional view as set out in paragraph 3.48 above? If you do not agree, please explain why you think the requirement is not necessary.</p>	<p>Confidential? – NO Yes I agree as consumers with non smart handsets can still use 2G / 3G handsets for mobile calls.</p>
<p>Question 5: Do you agree that it would not be appropriate to allow the use of licence-exempt repeaters in the 2.6 GHz band? If you do not agree, please explain your reasons.</p>	<p>Confidential? – NO I think it would not be appropriate as it might interfere with Wi-Fi router frequencies on 2.6ghz bands.</p>
<p>Question 6: Do you agree that we should allow the use of static indoor mobile phone repeaters (on a licence-exempt basis) in the paired 700 MHz mobile band?</p>	<p>Confidential? – NO Yes to static indoor mobile phone repeaters but only if the repeaters do not cause interference to terrestrial digital tv or mobile networks.</p>
