

To Ofcom,

I have to make this short as when I'm using touch screen I get static in my hands (the fingers I use to touch the screen can go temporarily numb) and burning sensation in my head and vibrations in my ears.

The reason why?

Two EE Three 5G towers have been placed within less than half a mile either side of my home. My home is on an incline/decline. And I "felt" those towers go on. And ruin my health and well-being ever since.

I didn't sleep last night as once the towers ramped up/changed frequency or whatever they do I couldn't sleep thereafter.

I believe when they were switched on my house was a hotspot. With no other antennae/routers/fibres or whatever else you put out into the environment my house was in the crossfire. The heat from the router was intolerable and the heat inside my body insufferable.

Your mmWave technology is a huge step too far. And you are causing people to have serious Electromagnetic/microwave/radiation/radio-wave issues. This is made worse by there been no direct emergency line to go to when things go wrong. As if because you can't see it you can't feel it. But you can feel it, there lies the big problem.

I don't stay long in my house now, I can't work from my house because I can't stay here long enough. I can't move I can't afford it. And how can I when you seem intent on putting the towers everywhere, even directly outside someone's house.

Personally I can't believe this is happening. It's a total infringement on someone's human rights if they don't want this 5G technology imposed on their home. Also you are destroying people's dignity, whether they are suffering from previous health problems or your companies actually give people health problems.

Bees are dead in my garden, Shrews are dead over the woods etc. I dread the winter when the trees go off the leaves and this technology is exposed even more onto my house. I feel terrorised by it and stressed out when your ofcom workers begin digging holes and planting equipment on my nearby lamppost and the surrounding areas. I don't go anywhere where I know there is loads of it i.e. city centres like Manchester and Liverpool. I used to live going there. It's discrimination to those who can feel it and whom suffer from it.

If it were so legitimate and not controversial then why aren't there any vans with 5G and smiley faces on? Why are the councils avoiding responsibility and not coming round to check radiation, radio-waves, EMF's etc?

It had been rolled out so underhand and rapid. With no prior notification of planning permission. I'd like you to check the two towers by the Jubille Inn, Pye Green Road, Hednesford and by Pye Green Academy, Rosehill, Hednesford please. Because I don't think they have planning permission and local residents were not notified. I'm also very concerned about the amount of work happening at the top of Pye Green on the old post office tower ... again no prior planning permission of any locals been notified. Even the fibre had just been illegally rolled out in front of peoples house without their consent. Those towers need to be checked because even the ICNRP have refused planning

permission on towers because the towers have been proven unsafe, even though they've approved this awful rollout prior.

I cannot live with any more of this technology near me and I don't want it nor need it. Your companies have totally compromised my health. I know this because every time I go away to countryside or the seaside I feel like my old self again ... no burning head, no rumbling ears and no vibrations inside my body. Until of course I come back to my home. I dread of course the thought you are rolling this out eventually in forests and in the sea. I will have nowhere to go to get away from it. What else are you going to injure, kill, destroy in the name of fifth generation technology.

I have to go now and turn off the wifi and all things that make me feel even sicker. I do hope you will come to understand the damage you are causing to people and wildlife. And stop this.
