

Question	Your response
<p><b>Question 1: Do you have any comments on our proposal to make Medium Power licences (42 dBm EIRP, up to 10m height) commonly available in urban areas across most of the UK, for the 3.8-4.2 GHz and 1800 MHz bands?</b></p>	<p>Confidential? – N</p> <p>We agree that making Medium Power licences commonly available in urban areas would be beneficial.</p>
<p><b>Question 2: Do you have any comments on our proposed balancing measures:</b></p> <p><b>i) to continue to only grant Medium Power licences in the Greater London area (as defined in our mm Wave work) by exception, applying the ‘premises sterilisation’ test?</b></p> <p><b>ii) to apply a 100 MHz limit to the amount of spectrum a licensee can transmit at Medium Power in a particular urban area?</b></p> <p><b>iii) to apply a new price as part of this liberalisation, set at £160 per 10 MHz for Medium Power licences in urban areas?</b></p>	<p>Confidential? – N</p> <p>i) Agree</p> <p>ii) Agree</p> <p>iii) We object to price increase for medium power licences – it is double the previous price which reduces the commercial viability in areas where service would be beneficial more than profitable. For smaller companies, where costs are primary consideration, it could prove prohibitive and limit them to low power solutions.</p>
<p><b>Question 3: Do you agree with our proposal to remove the TRR in relation to Low Power outdoor base stations in 3.8-4.2 GHz?</b></p>	<p>Confidential? – N</p> <p>We agree with this proposal.</p> <p>We would support this being applied to medium power as well as low power.</p>
<p><b>Question 4: In relation to our impact assessment, do you agree with our assessment of the potential impact of the further proposals we are making?</b></p>	<p>Confidential? – N</p> <p>We agree that the proposals will allow more users to access the band and open up for a more competitive environment.</p> <p>However, the increased cost could rule out new licensees from smaller companies from accessing the spectrum.</p>
