

Consultation title	Improving spectrum access for Wi-Fi – spectrum use in the 5 and 6 GHz bands
Organisation name	Sky UK

Your response

Question	Your response
Question 1: Do you have any comments on our proposal to open access to the 5925-6425 MHz band for licence-exempt Wi-Fi use?	Sky supports Ofcom's proposal to allow licence-exempt access to the 5925-6425 MHz band.
Question 2: Do you have any comments on our technical analysis of coexistence in the 5925-6425 MHz band?	We believe that the proposed limitations with EIRP of up to 250mW for indoor-only use and for 25mW both indoor and outdoor will be sufficient to protect the incumbents. These beliefs are also supported by ECC report 302, 316 and CEPT report 73
Question 3: Do you agree with our proposal to remove DFS requirements for indoor Wi-Fi up to 200mW from the 5725-5850 MHz band?	Yes, we support the removal of DFS.
Question 4: Do you have any comments on other options that may be available for Wi-Fi and RLANs within the 5 GHz band?
