Question	Your response
<p>Question 1: Do you agree with our proposals to change the in-band power limits contained in the Spectrum Access 800 MHz licence and Ofcom's assessment of the risk of interference? If you disagree, please provide details.</p>	<p>Confidential? – Y N</p> <p>3UK agrees. As 3UK explained in its formal licence variation request (submitted November 2020), and Ofcom rightly also acknowledges in this consultation, the use of the adjacent 700 MHz has changed from Digital Terrestrial Television (DTT) to another mobile service. It is therefore it is no longer necessary to retain restrictions that were imposed to protect DTT when it was in the 700 MHz band. 3UK refers to its formal licence variation request to demonstrate the benefits to end-users of Ofcom's proposals.</p>
<p>Question 2: Do you agree with our proposals to require licensees to have in place a mitigation scheme to resolve any DTT issues should they occur? If not, please provide details.</p>	<p>Confidential? – Y N</p> <p>As Ofcom points out, "DTT services now operate below 694 MHz and there is a significant frequency separation from mobile services operating in the 800 MHz band" (see paragraph 3.17 of the consultation). 3UK also agrees with Ofcom that the risk of interference to DTT equipment as a result of changes to the in-band power limit is small. At the same time, 3UK is happy to have a scheme in place to provide advice and assistance to viewers in the very unlikely event DTT viewers suffer undue interference, as per Ofcom's proposal. 3UK understand this view is shared by the other 800 MHz licensees.</p>
<p>Question 3: Do you agree with the proposals to relax the out-of-band emission limits? If you disagree, please provide details.</p>	<p>Confidential? – Y N</p> <p>3UK agrees with the proposals to relax the out-of-band emission limits.</p>

<p>Question 4: Do you agree with the proposals to reintroduce the transitional out-of-band and out-of-block emission limits? If you disagree, please provide details.</p>	<p>Confidential? – Y N</p> <p>3UK is fine to accept the reintroduction of the transitional out-of-band and out-of-block emission limits.</p>
<p>Question 5: Do you have any further comments on the technical assessment carried out by Ofcom in Annex 1 of this document.</p>	<p>Confidential? – Y N</p> <p>3UK has no further comments.</p>
<p>Question 6: Do you agree with Ofcom’s assessment on whether to change the emissions limits of the Spectrum Access 800 MHz licences? If you disagree, please provide further information.</p>	<p>Confidential? – Y N</p> <p>3UK has no comments on Ofcom’s assessment on whether to change the emissions limits of the Spectrum Access 800 MHz licences.</p>
