

# Vodafone Response to Ofcom Consultation:

“Ofcom’s proposals to update the  
technical conditions of mobile  
licences in the 800MHz band”

# Response

Vodafone welcomes the opportunity to respond to Ofcom's consultation on varying the technical conditions of mobile licences in the 800MHz band.

Our response is as follows:

1. We agree with Ofcom's proposals to change the in-band power limits contained in the Spectrum Access 800MHz licences, as it will increase operational flexibility with little possibility of increased interference risks.
2. We agree with the proposals to relax out-of-band emission limits as set out in the consultation.
3. Vodafone is committed to minimise interference to Digital Terrestrial Television (DTT) viewers. We will continue to utilise the services of Digital Mobile Spectrum Limited (DMSL) to educate viewers and deal with interference issues that may arise in compliance with the spectrum licence terms. DMSL has a proven track record in providing mitigation services to the satisfaction of both Government and Ofcom.
