

Your response

Question	Your response
<p>Do you have any comments on our proposals?</p>	<p>Confidential? – N</p> <p>It is interesting to read your priorities – especially in the area of online access (fixed and mobile). It was also interesting to read my response to your last consultation on your programme of work (2021)</p> <p>In short, for me and the surrounding households nothing has changed. Still 4Mb/s download, 1Mb/s upload, no 4G and no mobile signal indoors. I assume you store responses and so, if you are minded, you can read the detail which I will not duplicate here.</p> <p>Let me stress that I do not blame Ofcom for our poor communications infrastructure but you need to know that there are many people who are irritated by the lack of progress in so-called rural areas. Using averages to indicate progress is rather disingenuous when it is households who already have excellent speeds and coverage who receive improvements.</p> <p>On page 6 you use the term ‘World-class digital infrastructure’. From my perspective the word ‘Third’ should be placed in front of ‘World’.</p>
