

Your response

What is your response to this call for inputs?

N. My reference is to BBC 4 and Radio 4 I neither watch nor listen to anything else by the BBC. All programs are heavily middle class with a strong bias on Scotland. I hear no voices from any of the English regions such as Birmingham, Leicester Manchester Liverpool and South West. The occasional Welsh and Northern Irish. Each program has a Scottish reporter (Whose accent is not understandable) or the report is about a Scottish event failing that the "expert witness" is Scottish. The weather only ever spends 80% of its time talking of Scotland where no one actually lives it never mentions Isle of Wight which is British but always mentions Orkneys and Highlands which competes with the Gobi desert as the least populated place on the planet!! Let's hear news of the weather in places where the majority of the population pay their Licence fee. Women Hour leaks with middle class individuals never a voice of working class females who without doubt are the bed rock of the UK. As the BBC is a heavy user of repeats the above only gets reinforced on a daily basis and the argument the regions have their own regional programs does not hold water as Scotland has BBC1,BBC2 and Alba plus BBC radio Scotland yet the National station like a plague still carries a predominate Scottish flavour. I trust your review will carry an in depth survey of the LICENCE payers in England, Northern Ireland and Wales And finally why do we need reports on the "optimistically" named Scottish Premier Division what number of licence payers care who wins between Dundee and Arbroath, clearly not the majority or the minority in Wales and Northern Ireland and south west England
