

Your response

Question 1: What is your response to this consultation?

Confidential? – NO

ITS is a well qualified and experienced professional organisation very capable of providing the wide range of 21st century telecommunication services needed on a wide scale throughout the United Kingdom. We have consistently found there is insufficient or in fact no competition for the provision of high grade fibre optic and other more basic connections for business or individual connections with the public network for telephone, video, internet, security & other modern services. Approaches for all such connections to BT, OpenReach, Sky, Virgin, Vodafone etc, are being responded to with complete indifference, although Dorset County claims to be advocating & implementing wide scale deployment of fibre superfast broadband to be available everywhere in the county. We wholeheartedly support this application, and wish you God speed.
