

I live in Hemel Hempstead, within the reception area of Heart 4C.

Under your original proposal it seems that this station would be within the south approved area.

I would really not want any local programmes on Heart to be covering such a large area that would include places such as Brighton and Maidstone.

News and events from an area covering the east of England would be more relevant to me.

I feel it makes more sense to link the radio areas more closely to those used by ITV.

Martyn Wilson.
