

CONSULTATION RESPONSE

<p>NAME</p>	<p>Response to Proposal by Ofcom to grant powers under the Electronic Communication Code to Swish Fibre Limited</p>
<p>Name Withheld</p>	<p>Dear Sir, Madam:</p> <p>I am writing with regards to the Notification under section 107(6) of the Communications Act 2003 for Swish Fibre Limited’s application for the Electronic Communications Code.</p> <p>I am deeply concerned about this proposal, it states that the telecom company does not need works licences or planning permission and will take you to court if you refuse to let them install infrastructure on your own land.</p> <p>I have been doing some research on the rollout of 5G wireless systems and it is clear to me that there are serious health risks and dangers that are not being considered by these companies. In fact, just recently Brussels have blocked the rollout due to radiation concerns. There are also many independent scientists and doctors across the globe that are talking out on these risks that 5G will substantially increase exposure to radiofrequency electromagnetic fields, that has been proven to be harmful for humans and the environment. The 5G Appeal has been signed by 245 scientists and medical doctors.</p> <p>Therefore, I strongly appose this proposal for Swish Fibre Limited to be given more power and less restriction when I think we should be putting more prohibitions on this technology until it can be proven tot be safe. Out health and safety are not negotiable. If we are not being asked our consent we are under great threat, for as I see it, this is a global, for-profit, human experiment and a crime on humanity.</p>
