

CONSULTATION RESPONSE

NAME	Response to Proposal by Ofcom to grant powers under the Electronic Communication Code to Axione UK Limited, Cellnex Connectivity Solutions Limited and Cellnex UK Limited.
Richard Logan	<p>This is absolutely outrageous that the act essentially gives media companies carte blanche to erect structures wherever they chose with the public having no right to object. I'm sure your response will be that there are controls but the notification fails to mention them and how much it could cost. Progress should be addressed to the climate crisis not faster methods of communicating, what in the main, is rubbish!</p> <p>Again capitalism destroys! Sadly,</p>
