Question	Your response
<p>Should Ofcom consent to Secklow Sounds CIC's making the changes it proposes to the Key Commitments of Secklow Sounds, with particular regard to the statutory criteria set out in Section 2 of this consultation document? (Section 106 (1A) of the 1990 Broadcasting Act, as modified by the Community Radio Order 2004).</p>	<p>Please do not agree to change any of Secklow Sounds type of service</p> <p>This station has many problems and adjusting their type of service does not change any of the real problems with the station. At times the station is off air for hours at a time or repeats the same 15 seconds of a song over and over again and has automated songs with foul language playing almost everytime I tune in which I have complained about countless times without it ever getting better. Changing the amount of hours they broadcast will not help anything and certainly not the diverse community we live in. Your idea that the station is going to play music more modern like the other stations is not something Ofcom should agree to as this does attract older listeners who still rely on the radio for their information and the station should have more local news that matters and not just random council updates that do not mean anything to people out of the public sector. The reasons for the change make it look like they will have a new studio and an abundance of new programs so this change does not make any sense and should not be agreed. thank you</p>
