Question

I do not agree with the Planned Changes to SpiritFM, by the Bauer group. SpiritFM is our key local radio station and a single source of relevant "local" information, including news, travel, & weather. Over the past 24 years the Station has also supported many local charities and events within the local Chichester & Bognor Regis areas. Events that myself and my wife have attended or been part of the fund raising teams, so we can say first-hand that the planned change to a generalised regional approach will severely damage the local community.

This should not be allowed to occur, as it is the ONLY local station within our area and is a core part of the local community.
