

I wish to express my objection to the proposed frequency.

Absolute in a national station set up by the govt and should continue to be heard on analogue radio.

I listen a lot on fm and the station features quite a bit of new music which is very important .

Great hits in an oldie station, very good in its own way but is available in London on dab.

It has also replaced a delightful station such as dream 100 which was a shame.

Please keep Absolute radio on FM.
