

Proposal to apply Code powers to Freedom Fibre Limited

Response from: Name Withheld

Two and more objections:-

- I object to proposed discontinuation of newspaper announcements: I do not wish to live in a secretive society.
- I object to the proposal to grant powers to companies to deploy comms networks easily. I do not wish the streets I use to be cluttered with loops of wire. They should be put underground! Any installation in public space should be subject to planning regulation. Freedom Fibre should not be above the law which everyone else has to respect.

Discontinuation of newspaper announcements: so we are to live in a society secretly governed by Ofcom?

It is also objectionable that this is the last allowed opportunity to object to all or any of Ofcom proposals! Has Britain become a dictatorship? Is Ofcom the new dictator?

It is oppressive that ECC Companies may be allowed to construct on public land, install infrastructure without a licence, and/or without seeking planning permission.

I trust the courts will be sympathetic to a landowner who reasonably disagrees with Freedom Fibre's proposals,

Yours,
