

## Your response

Question	Your response
<p><b>Q1. Do you agree with our proposal to remove the requirement for licence-exempt indoor mobile repeaters to carry a 2G and/or 3G signal? If not, please set out your reasons with any supporting evidence.</b></p>	<p>Yes, we agree.</p>
<p><b>Q2. Do you agree with our proposals to amend the 2022 Regulations and associated Interface Requirements to align the use of in-vehicle mobile repeaters with the provisions for use of indoor repeaters? If not, please set out your reasons with any supporting evidence.</b></p>	<p>Yes, we agree.</p> <p>We kindly ask if Ofcom is planning to extend the regulation with the 3500 MHz band (3gpp band n78) for in-vehicle mobile repeaters? During the consultation for indoor repeaters in 2021 a question for implementation of 5G TDD bands was raised.</p> <p>Several participants of the consultation have mentioned the advantages of enabling the 3500 MHz band for repeater applications. We agree to their arguments and would appreciate to include this widely used 5G band for in-vehicle mobile repeaters.</p>
