

Question	Your response
<p><b>Question 1: Should Ofcom exercise its discretion to consent to the application to vary the Bradford small-scale multiplex licensed area, with regard to the statutory and policy considerations set out in this document?</b></p>	<p>No</p> <p>I strongly believe that if this request to reduce the coverage area, gets approved, it will be a very controversial and disastrous approval and it will also open the doors for the clever applicants in the future. As then everyone will apply with great drafted plans to beat the other applicants in the competition with an intension to make a request 6-months later for an easy key commitment change from Ofcom. This idea must be discouraged, as it will be damaging for the Dab future.</p>
<p><b>Question 2: With reference to our impact assessment, do you agree with our assessment of the potential impacts of approving this application?</b></p>	<p>No</p> <p>There is also a very clever systematic discrimination in the operational system of Bradford Dab. Being a commercial venture, the carriage rates are too high, in comparison to any Small Scale Dab in the UK which a small community radio can't afford, which clearly means that only high budget radio could use the Dab platform, and not a low budget one, is it not a discrimination?</p>
