

Hi Jon

I am responding by email as the form is difficult to fill in on a tablet

I live in the area covered by Touch FM SE Staffordshire on 102.4 from Burton.

I have a couple of points

1. I note the format that Quidem have requested and the wide reports that a deal to licence programming has been effected with Global. It's pretty obvious that the Touch SE Staffordshire FM licence will be transferred into a Capital Station.

The area around Burton and South Derbyshire is already covered by the Capital East Midlands Station so there would be a major reduction in listener choice in the area if Touch is flipped to Capital.

In the main document the list of stations available in the area does not include Capital East Midlands when it should - you have included the AM service linked to Capital 2. Is this change being advertised on Quidem stations ? So listeners can take a view.

Thank you
