

Your response

Question	Your response
Question 1: Do you agree with the planning principles and methodologies that we will use in our work to refine the coverage area plan for small-scale DAB?	Yes its the most practical and logical way forward.
Question 2: Do you agree with our proposed approach to the required technical licence conditions for small-scale radio multiplex services, and the proposed amendments to the Digital Radio Technical Code?	Yes, again the most logical way forward.
Question 3: Do you agree with Ofcom's proposed approach to setting the level of reserved capacity for C-DSP services on small-scale radio multiplex services?	Yes, I believe its vital to allow these services onto DAB and will stop a monopoly.
Question 4: Do you agree with the factors we are proposing to take into account of in deciding the order and timescale in which Ofcom will advertise small-scale radio multiplex licences?	Yes, happy with it.
Question 5: Do you agree with our proposed approach for assessing the technical plans submitted in small-scale radio multiplex licence applications?	Yes - Again reasonable and logical
Question 6: Do you agree with our proposed approach for assessing the ability of applicants to establish their proposed small-scale radio multiplex service?	Yes - Reasonable and vital to ensure sustainability and the technical capability.

<p>Question 7: Should Ofcom require that the studio of a C-DSP licensee be located within the coverage area of the small-scale radio multiplex service it plans to broadcast on? Please explain the reasons for your view.</p>	<p>I think some C-DSP licence holders should be from within the transmission area. However, if they provide a service of a niche subject, topic or something not on the multiplex I believe some should be allowed outside the area. It will provide diversity to listeners.</p>
<p>Question 8: We propose that holders of corresponding analogue community radio and DSP licences apportion their income equally across their licences, unless there are compelling reasons why a different apportionment is reasonable. Do you agree with our suggested approach?</p>	<p>Agree with this approach</p>
<p>Question 9: Do you agree with our proposal that a prospective C-DSP service provider will be able to apply for a C-DSP licence once we have invited applications for the small-scale radio multiplex licence upon which their proposed C-DSP service is intended to be provided?</p>	<p>Agree with this approach</p>
