

Yes

As a new resident to the area I have enjoyed listening to towns local radio station. I was surprised to learn that the purpose of it's broadcast was to target the youth and LGBT. I imagine this to be a small minority.

I moved here from Yorkshire and I find this station invaluable in keeping me up to date with local events and general stuff across town. I am therefore totally in favour of the station changing its format and becoming inclusive of all the community

I was also quite surprised to learn they are all volunteers.

I would very much like this service to continue to include everyone
