

Additional comments:

The proposal is probably acceptable where front doors are approached via a garden path or driveway and the "opt-out" sticker would be unlikely to be tampered with/removed. It has not been properly thought through however in cases where front doors lead directly off the street,

Question 1: Do you agree that Ofcom should grant approval to Royal Mail for the Delivery to Neighbour service? If not please explain your answer. :

No. This has not been thought through in relations to neighbourhoods like my own where the front doors are directly off the street. Most of my neighbours of transitory and several are drug abusers and I would not wish them to receive my deliveries.

The supplied "opt-out" sticker is completely inadequate for houses like mine as it is inevitable that it will be removed/tampered with.

Question 2: Are there other consequences following the roll out of the service across the UK that we have not included in our assessment? If so, please explain.:

I feel that packages addressed to myself will be delivered to transient neighbours and I will never see these. I purchase a lot of cds and vinyl records by mail order and have serious concerns about this

Question 3: Do you have any comments on the scope and wording of the proposed Notification and approval:
