Low

Representing:

Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

YES

The possible risks to human health posed by base stations close to houses, schools and the like are still unknown. Industry and government attempts to belittle all studies that show anything adverse are one of the reasons for believing that they know more than they are willing to admit.

It is very likely that quadrupling the power would increase the risk to human health.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

YES

As above.

What do the HPA have to say?

Why are other countries REDUCING limits?
