**What do you want Ofcom to keep confidential?**

Keep nothing confidential

**Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:**

Yes. As an adjacent band user MOD cannot, as yet, support this application. Further clarification and evidence is required to expand on the statement at paragraph 6.8 of the Consultation ('The proposed increase to the in-band CGC power limit is expected to have minimal effect'). A more definitive statement, with supporting evidence, is required given the operational importance of this portion of the band.

**Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:**

Yes. As per MOD's response to Q1.
