

Title:

Mrs

Forename:

Cressida

Surname:

Boyd

Representing:

Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Yes. There is strong and well-researched evidence that electro-magnetic waves are harmful to people:

http://www.theecologist.org/trial_investigations/290219/mobile_phones_and_health_what_do_we_know.html

<http://www.gq.com/cars-gear/gear-and-gadgets/201002/warning-cell-phone-radiation?currentPage=1>

We do NOT YET KNOW the long term effects of wifi and mobile phones on our health, and to increase the current strength of waves before we have gone any further with research would be folly.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Yes. Please please please look at all research that is NOT funded by mobile phone companies, or by companies with a vested interest in mobile phone profit margins.

Just look at the news today about members of medical councils ALL having ties to big pharmaceutical companies: supporting drugs that will increase sales that will in turn increase revenue for billion-pound companies. Although, since these pharmaceuticals are also linked

to governments I don't expect Ofcom to take any of this seriously as obviously Ofcom's eye MUST be on the money, rather than health.

But I live in hope.

Thank you for reading.
