

**Title:**

Mrs

**Forename:**

Danielle

**Surname:**

Egglestone

**Representing:**

Self

**What do you want Ofcom to keep confidential?**

Keep nothing confidential

**Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:**

There are many reasons why this cannot happen - effect of peoples health being a major factor. The intensity will cause more disruption to peoples lives in many different ways - although most people who make these things or work for telecommunication companies will deny it, there will be a larger risk to brain damage.

**Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:**

For what reason do they want to increase it - to get a better mobile signal?? At what cost?? That's what they really need to be asking themselves.
