

Title:

Mrs

Forename:

Sandra

Surname:

Rickell

Representing:

Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Health risks as outlined in many independent, published studies, including the 2007 BioInitiative Report- and because of the nature of the 3G service, masts having to be closer to peoples' homes.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Health risks again. This technology in public use is still in its infancy and the long term effects on UK residents are still unknown. More and more research is proving there are serious risks to health including cancer, tumours, Alzheimours, Leukemia, depression etc. now is the time to reign limits in not increase them.
