

Title:

Mrs

Forename:

Surname:

Trijbits

Representing:

Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

The health risks of exposure to mobile radiation are uncertain at best, but underlined by many studies worldwide to be harmful.

UK is lagging behind various developed countries who do take the existing research serious enough to reduce exposure

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

The health risks of exposure to mobile radiation are uncertain at best, but underlined by many studies worldwide to be harmful.

UK is lagging behind various developed countries who do take the existing research serious enough to reduce exposure
