

**Title:**

Ms

**Forename:**

Anne

**Surname:**

McGowan

**Representing:**

Self

**What do you want Ofcom to keep confidential?**

Keep nothing confidential

**Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:**

On Health grounds.

There are a number of studies which indicate health concerns at exposures below the current limits, so to boost exposure completely disregards the future health of our population.

Masts are currently in or near to schools with young children who I feel will be more vulnerable.

When original masts erected there is no community consultation; if the owner of the site of erection gives permission the community suffers; this increases the insult.

**Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:**

All of the above.
