Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Many studies (and this number is increasing) point to harm from microwave exposure below the UK exposure guidelines. This proposed increase will make matters worse. OFCOM is not in a position to consider the health aspect of this increase in exposures. It looks solely at the technical aspects.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Many studies (and this number is increasing) point to harm from microwave exposure below the UK exposure guidelines. This proposed increase will make matters worse. OFCOM is not in a position to consider the health aspect of this increase in exposures. It looks solely at the technical aspects.
