What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

I believe there has been enough scientific study such as the bio initiative report, which highlights the dangers of this technology for it to be considered a violation of our right to a safe environment should it continue.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

As previously stated the scientific evidence against this is in abundance, if this were a pharmaceutical trial it would have been removed from the market a long time ago.
