## **What do you want Ofcom to keep confidential?**

Keep name confidential

### **Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:**

The reasons for the original limits still apply. The increase is unnecessary and tries to ignore the findings which led to the previous limits. Perhaps the applicants are simply hoping to save money by building fewer masts. Reject.

### **Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:**

The reasons for the original limits still apply. The increase is unnecessary and tries to ignore the findings which led to the previous limits. Perhaps the applicants are simply hoping to save money by building fewer masts. Reject.
