What do you want Ofcom to keep confidential?

Keep name confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

There are 1000's of studies (and this number is ever increasing) pointing to harm from microwave exposure below the UK exposure guidelines. This proposed increase will only make matters much worse.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

OFCOM is not in a position to consider the health aspect of this increase in exposures. It looks solely at the technical aspects. Mast Sanity will be calling upon OFCOM to withdraw their proposals for this 3G Signal Power Increase
