What do you want Ofcom to keep confidential?

Keep name confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Health Grounds. Many of these masts are in residential areas. There is a mast near my son's Primary School. Do not want power to be increased due to potential health risks which are becoming more apparent.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Residential areas need to be protected for the long term health of residents. Output in such areas should not be allowed to be increased.
