What do you want Ofcom to keep confidential?

Keep name confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Yes, there should be no increase of the permitted EIRP as there may be a risk for everyone living near the transmissions. We and are families should not be subjected to potential harm for the commercial benefit of a small number of private companies.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Yes, there should be no increase of the permitted EIRP as there may be a risk for everyone living near the transmissions. We and are families should not be subjected to potential harm for the commercial benefit of a small number of private companies.
