What do you want Ofcom to keep confidential?

Keep name confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Yes.

Other European countries are reducing transmission / exposure limits in the light of mounting evidence of health impacts from mobile phone base stations. The precautionary principle is therefore appropriate, at least unless/until the safety of existing / increased limits has been established conclusively.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Yes. Reason as for Question 1.
