Ms

Forename:

Sami

Surname:

Chugg

Organisation (if applicable):

Safe Land for Bees

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

I object in the strongest terms to the increase you are proposing.

This is madness, as there is an increasing level of evidence that microwave radiation is harmful to all wildlife, including bees. The bees, as you are probably aware are dying and disappearing. We understand the bees as being, for humanity, the canary in the coal mine, If Bees die out, our own survival, and certainly our food security, would be under threat.

I refer you to the research of Mr Barrie Trower, which can be accessed by googling his name. Safe Land for Bees is a community based group of concerned citizens, including bee-keepers, who are hosting a public meeting in Bristol on April 11th 2010. At this event, Barrie will present a new paper entitled 'The true cost to the Environment and Ecosystems of the Telecommunications Industry.'

OFCOM have a responsibility to protect the public not endanger them. I suggest you attend our meeting and hear the facts

Yours sincerely, Sami Chugg, Chair. Safe Land For Bees

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Low level radiation (which is what microwaves cause) has now been proven to increase the incidence of cancer in humans and level of disruption of healthy behaviour in much wildlife

For new evidence on this contact Barrie Trower. His evidence can be accessed by googling

his name. [Ofcom note: Private Phone Number redacted]

I suggest that the sane response by yourselves would be to send someone to the above mentioned meeting to listen.

SAFE LAND FOR BEES Public Event: 11 April 2010, 1.30 - 5pm
Windmill Hill Community Centre, Vivian Street, Windmill Hill, Bristol BS3 4LW. web:
