Miller

Representing:

Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

there are more than reasonable health grounds as the UK Population will be subjected to significantly more damaging microwave radiation ? at a time when some other countries are reducing their exposure limits. I urge you to consult the Bio-Initiative Report.

On technical grounds I foresee more problems with automobiles which have computer management controls and cell mast radiation is already causing havoc with certain Toyota models and other undisclosed makes.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

For exactly the same reasons as stated to Question 1.
